

GPS Tracking Technology:

An Essential Tool for Fleet Safety and Security

“ Do you know where I saw one of your trucks parked last night at 1:00 am? ”

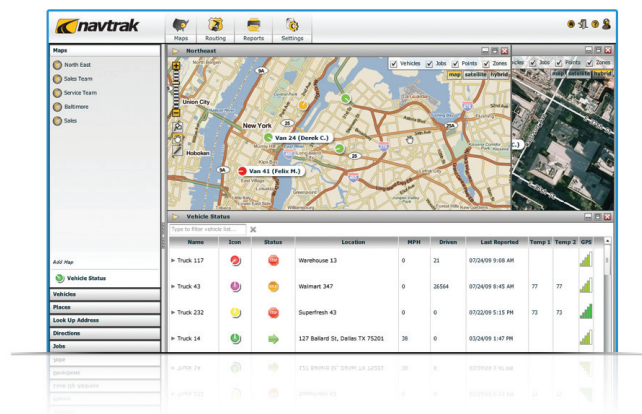

“ One of your trucks nearly ran me off the road, going 80 miles per hour on I-95! ”

Most fleet managers and business owners would probably summarize their concerns over the vehicles and other mobile equipment crucial to their operation using one word: liability. Being in the dark about where your drivers or trucks are, what they're doing/not doing, and whether or not they're secure can have a devastating effect on your business' productivity — and reputation.

But what if there were a tool that could show you exactly where all of your vehicles are (or were) at any time, monitor key driving performance metrics (such as driving speeds, idling times and more), track down stolen vehicles, unlock doors remotely, and set up alerts for when vehicles enter or leave a particular area – all from your computer? Wouldn't having this information available to you at any time increase peace of mind?

Thankfully, that peace of mind is available right now -- and more and more organizations across the country are taking advantage of it. Navtrak's GPS-based fleet management system allows businesses to better manage, monitor and communicate with their mobile workforce. This 24/7 control of your mobile operation leads to all kinds of benefits when it comes to the safety and security of your fleet, such as:

- **Managing excessive speeding by your drivers**
- **Reducing the risk of accidents**
- **Monitoring vehicle operation**
- **Controlling functions of a vehicle remotely**
- **Real-time vehicle location**
- **“Panic button” option for driver emergencies**

Navtrak informs you of your entire fleet's location and activities at any given moment, with just a click of your mouse.

With so many security benefits, plus the ability to prevent unauthorized usage of vehicles, track down stolen equipment quickly and accurately, and get to your drivers quickly in the event of an accident or incident on the road, you can rest assured that your fleet is being properly and efficiently managed with Navtrak. The word “liability” doesn't need to keep you awake at night any longer!

Navtrak, Inc., a leading provider of GPS-based fleet management services, was founded in 1999 and is currently tracking vehicles for thousands of fleets nationwide.
